Safe Kiting Guidelines - English

No kiteboarding before 11:00AM.
Maintain a 200ft clear zone around all divers.
Always use a "Kite Depower Release" device.
Stay clear of power lines and overhead obstructions.
Select a safe launching site.
Always maintain a downwind safety buffer zone.
Keep windsurfers outside the powercone.
Observe all mapped kitesurfing boundaries.
Do not lay kite lines across any ones path.
Do not launch or land at crowded areas.
Always announce you are launching a kite.
Give way to all other water users.
Incoming kiter gives way to the outgoing kiter.
When consideration has been given to the above, normal sailing rules apply.
Prevent kites from relaunching with sand.
Disable unattended kites.

Maui's beaches, airspace and ocean environment belongs to everyone. Keep our beaches safe, clean and free.

The north shore of Maui is controlled by the Federal Aviation Regulations in an area that extends five miles from the boundary of Kahului Airport (OGG). All kitesurfers should get a copy of Federal Aviation Regulation 101. a printout of the regulation can be obtained from the FAA website: www.faa.gov. Kitesurfers intending to kitesurf on the North shore will have to comply with FAR 101 at all times. In particular FAR regulation 101.1 paragraph 2 which states that no-one may operate a kite weighing more than 5 pounds and FAR 101.7 which states that you may not fly your kite in a manner which is hazardous to persons or property. The MKA recommends that any kitesurfer on the north shore be thoroughly familiar with the FAR 101 regulations.
